Education

09/2019-07/2023 **University of Leeds**

- Bachelor of Engineering in Electronic and Electrical Engineering
- Graduated as First Class I with Honour

Southwest Jiaotong University (SWJTU)

- Bachelor of Engineering in Electronic and Electrical Engineering
- GPA: 3.55/4
- Professional Skills: MATLAB, Python <PyTorch, Transformers>

08/2023-Present **The Hong Kong University of Science and Technology (Guangzhou)**

- Master of Philosophy (M.Phil.) Supervised by Prof. Song JIE and Prof. Xuming HU
- Postgraduate Scholarship of ¥ 240,000
- Research on Visual Language Model Hallucination Mitigation and Role-LLM Reasoning
- Current GPA: 3.56/4

Internship

08/2025-Present **Shanghai AI Lab**

- Position at Knowledge Frontier Centre
- Research on large scale multi-model information retrieval
- Research on multi-encoder MLLMs
- Research on RL for MLLM reasoning

Project

05/2025-Present [Ongoing] **Edge Device STT-LLM-TTS Demo**

- Deploy fine-tuned LLM with STT and TTS on RK35**-based system
- Extremely low latency for edge on-device chat experience
- Project Repository available soon

02/2025-Present [Ongoing] **YouShouChat: Role-Play LLM with Unique Characteristics and Memories**

- One-step workflow for data generation and sampling
- Customized training strategies, quantization and RAG framework
- Project Repository available at https://github.com/1zhou-Wang/YouShouChat
- Currently open for test

08/2025-Present [Under Review] **Investigating Redundancy in Multimodal Large Language Models with Multiple Vision Encoders**

- Published as first author
- Research on encoder-level efficiency for MLLMs with multiple vision encoders
- Experimental results show large information gap between encoders
- MLLMs do not behave well with more than 2 vision encoders
- Pre-Print Paper available at https://arxiv.org/pdf/2507.03262

05/2025-Present — [Under Review] **CondenseVLM: High-Fidelity Visual Token Condensation for Large Vision-Language Models**

- Developed token merging for MLLM efficient reasoning
- SOTA performance in 9 popular benchmarks
- Project Repository available soon
- Pre-Print Paper available soon

02/2025-05/2025 — [NeurIPS 2025] **Don't Just Chase "Highlighted Tokens" in MLLMs: Revisiting Visual Holistic Context Retention**

- Developed holistic token pruning for MLLMs
- SOTA performance in 9 popular image-QA benchmarks at different pruning ratios
- SOTA performance in 2 popular video-QA benchmarks
- More efficient and reasonable pruning strategies upon visualization
- Project Repository available at: https://github.com/obananas/HoloV
- Pre-Print Paper available at: https://arxiv.org/pdf/2510.02912

07/2024-11/2024 — [ICML 2025] **Memory-Space Visual Retracing for Hallucination Mitigation in Multimodal Large Language Models**

- Published as co-first author
- Developed training-free inferencing structure for mitigating MLLM hallucination
- SOTA performance in 7 popular benchmarks with 3 MLLMs tested
- Extremely high efficiency in inferencing token generation speed and memory occupation
- Popular GitHub Repository with 100+ stars!
- Project Repository available at https://github.com/1zhou-Wang/MemVR
- Pre-Print Paper available at https://arxiv.org/pdf/2410.03577

12/2023-Present — **Multi-Functional Mobile Platform**

- Awarded with Excellent RBM Project (Top 8/70)
- Developed Mobile robot platform with gripper and dexterous hand
- ICRA 2024 AXS Sim2Real Challenge 3rd in Simulation stage and 2nd in onsite competition
- Project Repository available at: https://github.com/1zhou-Wang/Multifunctional-Mobile-Platform

Service:

10/2025-Present — **ICLR 2025 Reviewer**
